Baseline Risk Assessment (Extract)

Hazard register for the Kya Sand bakery, signed 16 February 2026

1. Scope, team and method

Item	Detail
Site and activities	Bakery at 41 Bernie Street, Kya Sand, Randburg: flour receiving and storage, mixing, dividing and moulding, baking, packing, cleaning, dispatch and maintenance. 88 employees on two shifts.
Risk assessor	Karabo Mokoena, registered health and safety practitioner, appointed in writing as risk assessor on 12 January 2026 (appointment and registration filed in Section B)
Team	Deon Swanepoel, Production Manager; Gift Mathebula, Maintenance Foreman; Zanele Khumalo, health and safety representative, mixing and baking; Ayesha Patel, health and safety representative, packing and dispatch
Assessment dates	2 to 13 February 2026, on both shifts
Method	Walk through of every area and task, talks with the people doing the work, and a review of the incident register for 2025. Each risk is rated as likelihood (1 rare to 5 almost certain) times severity (1 first aid case to 5 fatality or permanent disability): 1 to 6 low, 8 to 12 medium, 15 to 25 high. Controls are chosen in the order elimination, substitution, engineering, administrative, then protective equipment.

2. Hazard register

Hazard and possible harm	Risk (L x S)	Controls, in the order of the hierarchy	Residual risk	Owner
1. Flour dust in mixing and when tipping bags: breathing problems and skin irritation	16 High (4 x 4)	Substitution: bulk flour silo feed replaces hand tipping on mixers 1 and 2. Engineering: local exhaust ventilation at the tipping station. Administrative: no dry sweeping; vacuum cleaning; exposure monitoring by an approved inspection authority. Protective equipment: respirators fit tested for bag tipping.	8 Medium	Deon Swanepoel, review 16/02/2027

Hazard and possible harm	Risk (L x S)	Controls, in the order of the hierarchy	Residual risk	Owner
2. Hot ovens, trays and racks: burns	9 Medium (3 x 3)	Engineering: oven door guards and rack stops. Administrative: hot surface signs; safe work procedure for loading ovens. Protective equipment: heat resistant gloves and sleeves.	4 Low	Deon Swanepoel, review 16/02/2027
3. Moving parts of mixers and dividers during cleaning: crushing and amputation	10 Medium (2 x 5)	Engineering: interlocked guards on every mixer and divider. Administrative: lockout before cleaning or clearing a blockage; only trained operators; daily guard check by the supervisor.	5 Low	Gift Mathebula, review 16/02/2027
4. Forklifts and pedestrians at the dispatch dock: being struck	15 High (3 x 5)	Engineering: barriers and marked walkways that keep pedestrians out of the loading bay; blue spot lights on forklifts. Administrative: no pedestrians in the loading bay while loading is under way; trained and authorised operators only; daily pre use checks; speed limit.	5 Low	Deon Swanepoel, review 16/02/2027
5. Lifting 25 kg flour bags and full trays: back and shoulder injuries	12 Medium (4 x 3)	Engineering: bag lift assist at the small batch mixer; trolleys for trays. Administrative: team lifts; manual handling training; job rotation every two hours.	6 Low	Deon Swanepoel, review 16/02/2027
6. Cleaning chemicals, including caustic oven cleaner: burns to skin and eyes	12 Medium (3 x 4)	Substitution: milder degreaser for daily cleaning. Engineering: dosing unit for dilution. Administrative: safety data sheets at the chemical store; chemical handling training. Protective equipment: goggles, gloves and aprons; eyewash station.	6 Low	Ayesha Patel, review 16/02/2027
7. Wet and floury floors: slips and falls	8 Medium (4 x 2)	Engineering: slip resistant flooring in the wash area. Administrative: clean as you go; wet floor signs. Protective equipment: slip resistant safety shoes.	4 Low	Deon Swanepoel, review 16/02/2027

3. Employee consultation

The draft register was discussed at the health and safety committee meeting of **11 February 2026** and at toolbox talks on both shifts on **12 and 13 February 2026**, attended by 79 employees (registers filed in Section D). Employees asked for a second eyewash station at the wash bay and for job rotation on the packing line; both were added. The health and safety representatives walked the site with the risk assessor and signed below.

4. Review

This assessment is reviewed every year, and sooner after an incident, a new machine, a new substance, a change in a process or a request from the health and safety committee. Issue based and task based risk assessments are filed with it in Section C.

Risk assessor

Karabo Mokoena, Date: 16/02/2026

Health and safety representative

Zanele Khumalo, Date: 16/02/2026

Approved: Managing Director

Rudi Venter, Date: 16/02/2026

End of the example. The company, people and records in it are fictitious; the cover page explains how to use it.
