

Legislation register

Release 1.0.0, as at 20/09/2026. 17 industries covered. 31 verified instruments.

Every Medical Surveillance Plan produced by Care Net Consultants is drafted against this register. Each instrument is verified three ways before it may be cited: against the primary text, an independent corroborating source, and a currency check that confirms it is still in force. Anything that fails a check is left out rather than guessed at. The register is reviewed every month, and the live version is published at carenetconsultants.co.za under Build your Plan.

Verified means the instrument passed all three checks on that date. Next review is when the currency check is repeated, or sooner if the law moves first. Pending instruments are never listed here and never reach a Plan.

The industries covered

Industry	Regime	Areas of work	Roles	Instruments
Agriculture and forestry	Occupational Health and Safety Act	3	19	13
Cleaning and hygiene services	Occupational Health and Safety Act	2	10	11
Construction	Occupational Health and Safety Act	5	31	17
Education	Occupational Health and Safety Act	2	10	16
Government and municipal	Occupational Health and Safety Act	3	16	17
Healthcare and laboratories	Occupational Health and Safety Act	3	18	13
Hospitality and food service	Occupational Health and Safety Act	2	12	14
Manufacturing	Occupational Health and Safety Act	7	41	18
Mining	Mine Health and Safety Act	6	35	14
Office and professional services	Occupational Health and Safety Act	2	10	14
Petrochemical and fuel retail	Occupational Health and Safety Act	3	16	17
Retail and wholesale	Occupational Health and Safety Act	2	12	14
Security services	Occupational Health and Safety Act	2	10	9
Telecommunications and tower work	Occupational Health and Safety Act	3	15	16
Transport and logistics	Occupational Health and Safety Act	5	30	15
Utilities and energy	Occupational Health and Safety Act	3	16	14
Waste management	Occupational Health and Safety Act	3	15	15

The register

Listed alphabetically. The number is a position in this release, not a statutory reference.

1. Asbestos Abatement Regulations, 2020

Asbestos Abatement Regulations, 2020, GN R.1196, Government Gazette 43893, 10 November 2020, as amended by GN R.11435, Government Gazette 46380, 20 May 2022, made under the Occupational Health and Safety Act 85 of 1993 Regulation | Gazette: GN R.1196, GG 43893; amended GN R.11435, GG 46380 | Effective 10/11/2020

In force August 2026 as amended 2022. Governs identification, inventory, risk assessment, management plans, notification, and control of asbestos work, with medical surveillance duties for exposed employees.

Applies to: Manufacturing.

Verified 13/08/2026. Next review 13/08/2027.

2. BCEA night work Code

Basic Conditions of Employment Act 75 of 1997, section 17(3), read with the Code of Good Practice on the Arrangement of Working Time

Code of good practice | Effective 01/12/1998

Section 17(3)(b): an employee performing regular night work is entitled to a medical examination at commencement of regular night work and at regular intervals thereafter, at the employer's expense. The Code guides frequency by health status, nature of work, and working hours.

Applies to every industry covered.

Verified 12/08/2026. Next review 12/08/2027.

3. COIDA

Compensation for Occupational Injuries and Diseases Act 130 of 1993, as amended by the Compensation for Occupational Injuries and Diseases Amendment Act 10 of 2022

Act | Effective 01/03/1994

Amendment Act 10 of 2022 brought into operation in phases by Proclamation 306 of 2026: 23 January 2026, 1 February 2026, and 1 April 2026. Post traumatic stress disorder formally recognised as an occupational disease. Employer conveyance and work related training injuries brought within scope. Three year prescription period for claims.

Applies to every industry covered.

Verified 12/08/2026. Next review 01/02/2027.

4. Construction Regulations, 2014

Construction Regulations, 2014, GN R.84, Government Gazette 37305, 7 February 2014, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.84, GG 37305 | Effective 07/02/2014

In force August 2026. Annexure 3 prescribes the Medical Certificate of Fitness for construction work, valid for one year from date of issue.

Applies to: Cleaning and hygiene services, Construction, Telecommunications and tower work, Utilities and energy.

Verified 12/08/2026. Next review 12/08/2027.

5. Driven Machinery Regulations

Driven Machinery Regulations, 2015, promulgated 24 June 2015 under GNR 539, 540 and 542 of 2015 in Government Gazettes 38904 and 38905, made under the Occupational Health and Safety Act 85 of 1993. Regulation 18 (lifting machines) requires that lifting machines are operated only by persons who are trained, certified competent, authorised in writing, and in possession of a medical certificate of fitness.

Regulation | Gazette: GNR 539, 540 and 542 of 2015; GG 38904 and 38905; 24 June 2015 | Effective 24/06/2015

Promulgated 24 June 2015, replacing the Driven Machinery Regulations of 1988. Guidelines published 31 March 2017 (GG 40734). The 2024 National Code of Practice for the Training Providers of Lifting Machine Operators has been incorporated into the Regulations. In force August 2026.

Applies to: Construction, Government and municipal, Manufacturing, Mining, Petrochemical and fuel retail, Retail and wholesale, Telecommunications and tower work, Transport and logistics, Waste management.

Verified 13/08/2026. Next review 13/08/2027.

6. EEA section 7

Employment Equity Act 55 of 1998, section 7 (medical testing)

Act | Effective 09/08/1999

Section 7(1): medical testing of an employee is prohibited unless legislation permits or requires it, or it is justifiable in the light of medical facts, employment conditions, social policy, the fair distribution of employee benefits, or the inherent requirements of a job. Section 7(2): HIV status testing only where the Labour Court determines it justifiable under section 50(4). Section unchanged by the Employment Equity Amendment Act 4 of 2022.

Applies to every industry covered.

Verified 12/08/2026. Next review 12/08/2027.

7. Electrical Machinery and Installation Regulations

Electrical Machinery Regulations, 2011, GN R.250, Government Gazette 34154, in operation 1 July 2011, read with the Electrical Installation Regulations, 2009, GN R.242, Government Gazette 31975, in operation 1 May 2009, both made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.250, GG 34154; GN R.242, GG 31975 | Effective 01/07/2011

In force August 2026. The Machinery Regulations apply to users who generate, transmit, or distribute electricity to the point of supply; the Installation Regulations govern electrical installation work and registered person requirements. Neither prescribes a standing medical battery: electrical work fitness rests on Employment Equity Act section 7 inherent requirements, with these Regulations anchoring the hazard and competency context.

Applies to: Government and municipal, Hospitality and food service, Petrochemical and fuel retail, Telecommunications and tower work, Utilities and energy.

Verified 13/08/2026. Next review 13/08/2027.

8. Environmental Regulations for Workplaces, 1987

Environmental Regulations for Workplaces, 1987, GN R.2281 of 16 October 1987, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.2281, 16 October 1987 | Effective 16/10/1987

In force August 2026. Regulation 2(4): the time weighted average WBGT index shall not exceed 30. Regulation 5(4): where the average WBGT index exceeds 30, workers must be certified fit for work in hot environments, with acclimatisation, hydration, training, and first aid duties on the employer.

Applies to: Agriculture and forestry, Construction, Education, Government and municipal, Hospitality and food service, Manufacturing, Petrochemical and fuel retail, Retail and wholesale, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 13/08/2026. Next review 13/08/2027.

9. Ergonomics Regulations, 2019

Ergonomics Regulations, 2019, GN R.1589, Government Gazette 42894, 6 December 2019, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.1589, GG 42894 | Effective 06/12/2019

In force August 2026. Requires an ergonomics programme including risk assessment, hierarchy of controls, training, and medical surveillance overseen by an occupational medicine practitioner, with baseline, periodic, and finding driven examinations.

Applies to: Agriculture and forestry, Cleaning and hygiene services, Construction, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Mining, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 12/08/2026. Next review 12/08/2027.

10. Facilities Regulations, 2004

Facilities Regulations, 2004, GNR 924, 3 August 2004, made under the Occupational Health and Safety Act 85 of 1993, replacing the Facilities Regulations, 1990. The Regulations govern workplace sanitation, drinking water (SABS 241 compliant), washing facilities, seating, and changing rooms. They prescribe no standing medical battery: they anchor the workplace welfare context for sedentary and service workforces.

Regulation | Gazette: GNR 924, 3 August 2004 | Effective 03/08/2004

Promulgated 3 August 2004, replacing the Facilities Regulations, 1990. In force August 2026.

Applies to: Office and professional services.

Verified 13/08/2026. Next review 13/08/2027.

11. Fitness to Perform Work Guideline (MHSA)

Guideline for the Compilation of a Mandatory Code of Practice on the Minimum Standards of Fitness to Perform Work at a Mine, GN R.147, Government Gazette 39656, 5 February 2016, effective 30 June 2016, DMRE reference DMR 16/3/2/3-A3

Guideline | Gazette: GN R.147, GG 39656; DMR 16/3/2/3-A3 | Effective 30/06/2016

First issued 1 March 2003, last revised 30 June 2013, gazetted 5 February 2016 with effect from 30 June 2016. Guides Occupational Medical Practitioners in determining fitness to perform specified work at a mine; every mine must compile its mandatory Code of Practice on these minimum standards.

Applies to: Mining.

Verified 13/08/2026. Next review 13/08/2027.

12. Food Premises Hygiene Regulations, R638 of 2018

Regulations Governing General Hygiene Requirements for Food Premises, the Transport of Food and Related Matters, R638 of 2018, Government Gazette 41730, 22 June 2018, made under the Foodstuffs, Cosmetics and Disinfectants Act 54 of 1972. The Regulations require that no person suffering from a communicable or infectious condition in a transmissible form handles food, and govern the health, hygiene, and protective clothing of food handlers.

Regulation | Gazette: R638, GG 41730, 22 June 2018 | Effective 22/06/2018

Promulgated 22 June 2018, repealing and replacing R962 of 2012; Certificates of Acceptability issued under the repealed regulations expired 22 June 2019. In force August 2026 as the operative national food premises hygiene standard. This is a food safety instrument: it excludes symptomatic handlers from food work rather than prescribing an occupational medical battery, and the lawful basis for any fitness testing remains EEA section 7.

Applies to: Education, Hospitality and food service, Manufacturing, Petrochemical and fuel retail.

Verified 13/08/2026. Next review 13/08/2027.

13. General Administrative Regulations, 2003

General Administrative Regulations, 2003, GNR 929, Government Gazette 25129, 25 June 2003, made under section 43 of the Occupational Health and Safety Act 85 of 1993 after consultation with the Advisory Council for Occupational Health and Safety, repealing GNR 1449 of 6 September 1996. The Regulations govern incident reporting and recording, health and safety representatives and committees, and administrative duties. They prescribe no standing medical battery: the incident recording duties they impose feed the surveillance programme's review triggers.

Regulation | Gazette: GNR 929, GG 25129, 25 June 2003 | Effective 25/06/2003

Published 25 June 2003, repealing the 1996 General Administrative Regulations (GNR 1449). In force August 2026.

Applies to: Construction, Education, Office and professional services.

Verified 13/08/2026. Next review 13/08/2027.

14. General Machinery Regulations, 1988

General Machinery Regulations, 1988, GNR 1521, Government Gazette 11443, 5 August 1988, made under the Machinery and Occupational Safety Act 6 of 1983 and kept in force under the Occupational Health and Safety Act 85 of 1993. The Regulations govern machinery supervision, safeguarding, and operation duties for machinery classes not covered by other regulations. They prescribe no standing medical battery: fitness for machinery work rests on EEA section 7 inherent requirements.

Regulation | Gazette: GNR 1521, GG 11443, 5 August 1988 | Effective 05/08/1988

Published 5 August 1988 under the Machinery and Occupational Safety Act 6 of 1983; carried into force under section 44 of the Occupational Health and Safety Act 85 of 1993. Currency watch: a draft General Machinery Regulation, 2025 was published for public comment (GN 6532, GG 53210, August 2025) with the intention of replacing these Regulations; in force August 2026 pending that process.

Applies to: Government and municipal.

Verified 13/08/2026. Next review 13/02/2027.

15. General Safety Regulations, 1986

General Safety Regulations, 1986, GNR 1031, Government Gazette 10252, 30 May 1986, made under the Machinery and Occupational Safety Act 6 of 1983 and kept in force under the Occupational Health and Safety Act 85 of 1993. The Regulations govern first aid provision, personal protective equipment, work in elevated positions, ladders, and general workplace safety duties. They prescribe no standing medical battery: fitness for the work they govern rests on EEA section 7 inherent requirements.

Regulation | Gazette: GNR 1031, GG 10252, 30 May 1986 | Effective 30/05/1986

Published 30 May 1986 under the Machinery and Occupational Safety Act 6 of 1983; carried into force under section 44 of the Occupational Health and Safety Act 85 of 1993. In force August 2026 with amendments to the first aid and PPE provisions recorded in the consolidated texts.

Applies to: Construction, Education, Government and municipal, Office and professional services, Petrochemical and fuel retail, Telecommunications and tower work.

Verified 13/08/2026. Next review 13/08/2027.

16. Hazardous Substances Act (radiation control)

Hazardous Substances Act 15 of 1973, Group III and Group IV hazardous substances provisions for ionising radiation, administered by the SAHPRA Radiation Control programme

Act | Effective 01/04/1973

In force August 2026. Electronic generators of ionising radiation are Group III and radioactive sources Group IV hazardous substances; regulatory control, licensing, personal dose monitoring, and radiation worker protection run through SAHPRA Radiation Control (formerly the Department of Health Directorate Radiation Control), including the published radiation monitoring requirements guideline. Dose limits and monitoring conditions are applied from the licence and the SAHPRA guideline at examination time, never from memory.

Applies to: Healthcare and laboratories.

Verified 13/08/2026. Next review 13/08/2027.

17. HBA Regulations, 2022

Regulations for Hazardous Biological Agents, 2022, GN R.1887 of 16 March 2022, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.1887, 16 March 2022 | Effective 16/03/2022

In force August 2026. Requires a documented medical surveillance system overseen by an occupational health practitioner where the HBA risk assessment indicates exposure risk with an identifiable disease or effect and a detection technique; all tests per a written medical protocol.

Applies to: Agriculture and forestry, Cleaning and hygiene services, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Retail and wholesale, Utilities and energy, Waste management.

Verified 13/08/2026. Next review 13/08/2027.

18. HCA Regulations, 2021

Regulations for Hazardous Chemical Agents, 2021, GN R.280, Government Gazette 44348 (Regulation Gazette 11263), 29 March 2021, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.280, GG 44348, RG 11263 | Effective 29/03/2021

Replaced the Hazardous Chemical Substances Regulations, 1995. Annexure tables list occupational exposure limits including respirable crystalline silica at 0.1 mg per cubic metre, 8 hour TWA. Medical surveillance duties for exposed employees.

Applies to: Agriculture and forestry, Cleaning and hygiene services, Construction, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 12/08/2026. Next review 12/08/2027.

19. HPCSA Booklet 1

HPCSA General Ethical Guidelines for the Health Care Professions, Booklet 1, December 2021 revision

HPCSA ethical guideline | Effective 01/12/2021

Current HPCSA ethical baseline for all registered practitioners. December 2021 revision current at check date.

Applies to every industry covered.

Verified 12/08/2026. Next review 12/08/2027.

20. HPCSA Booklet 10

HPCSA General Ethical Guidelines for Good Practice in Telehealth, Booklet 10, revised December 2021

HPCSA ethical guideline | Effective 01/12/2021

Telehealth guidance revised December 2021. Telehealth is not equivalent to face to face care and must not be introduced solely to cut costs or as a perverse incentive.

Applies to: Construction, Healthcare and laboratories, Manufacturing, Mining, Transport and logistics.

Verified 12/08/2026. Next review 12/08/2027.

21. HPCSA Booklet 11

HPCSA Guidelines on Over Servicing, Perverse Incentives and Related Matters, Booklet 11

HPCSA ethical guideline | Effective 01/12/2021

Prohibits perverse incentives including charging or benefit arrangements around referrals. The house consequence: the employer is the payer and receiving specialists are never charged for referrals.

Applies to every industry covered.

Verified 12/08/2026. Next review 12/08/2027.

22. Lead Regulations, 2001

Lead Regulations, 2001, GN R.236, Government Gazette 23175, 28 February 2002, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.236, GG 23175 | Effective 28/02/2002

In force August 2026. Airborne occupational exposure limit for lead 0.15 mg per cubic metre. Medical surveillance with biological monitoring: medical removal at a blood lead of 60 micrograms per decilitre (or 10 micrograms ZPP per gram haemoglobin); for women capable of procreation, removal at 40 and return at 30 micrograms per decilitre.

Applies to: Manufacturing.

Verified 13/08/2026. Next review 13/08/2027.

23. MHI Regulations, 2022

Major Hazard Installation Regulations, 2022, GN R.2989, Regulation Gazette 11536, Government Gazette 47970, in operation 31 January 2023, made under section 43 of the Occupational Health and Safety Act 85 of 1993, repealing the Major Hazard Installation Regulations, 2001 (GN R.692 of 30 July 2001). The Regulations govern risk assessments, emergency plans, and duties at installations holding threshold quantities of hazardous substances. They prescribe no standing medical battery: worker surveillance at major hazard installations rests on the HCA and companion OHSA instruments and the lawful testing basis is EEA section 7, with these Regulations anchoring the installation risk context.

Regulation | Gazette: GN R.2989, RG 11536, GG 47970; in operation 31 January 2023 | Effective 31/01/2023

Promulgated 31 January 2023 with immediate repeal of the 2001 Regulations; correction notice GN 3420, GG 48627, 19 May 2023. In force August 2026.

Applies to: Petrochemical and fuel retail.

Verified 13/08/2026. Next review 13/08/2027.

24. MHSA

Mine Health and Safety Act 29 of 1996, section 13 medical surveillance provisions

Act | Effective 15/01/1997

In force August 2026. Section 13: the employer must establish and maintain a system of medical surveillance of employees exposed to health hazards, consisting of an initial medical examination and further examinations at appropriate intervals; persons working at a mine must be declared medically fit before performing work.

Applies to: Mining.

Verified 13/08/2026. Next review 13/08/2027.

25. NEM Waste Act

National Environmental Management: Waste Act 59 of 2008, Government Gazette 32000, in operation 1 July 2009. The Act governs waste management licensing, the duty of care for waste holders, and healthcare risk waste control. It prescribes no standing occupational medical battery: waste worker surveillance rests on the OHSA instrument set and the lawful testing basis is EEA section 7, with this Act anchoring the sector duty of care context.

Act | Gazette: Act 59 of 2008, GG 32000; in operation 1 July 2009 | Effective 01/07/2009

Amended by Act 14 of 2013, Act 25 of 2014, Act 26 of 2014 (GG 37714, with effect from 2 June 2014), and Act 2 of 2022; consolidated text current to 30 June 2023 on the national law library. In force August 2026.

Applies to: Waste management.

Verified 13/08/2026. Next review 13/08/2027.

26. NIHL Regulations, 2003

Noise-Induced Hearing Loss Regulations, 2003, GN R.307 of 7 March 2003, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN R.307, 7 March 2003 | Effective 07/03/2003

REPEAL PENDING: regulation 18 of the Noise Exposure Regulations, 2024 repeals these Regulations 18 months after promulgation of 6 March 2025, that is with effect from 6 September 2026. In force until that date. Noise rating limit 85 dB(A) 8 hour rating level. Audiometric testing required for exposed employees.

Applies to: Agriculture and forestry, Construction, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Mining, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Security services, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 12/08/2026. Next review 06/09/2026.

27. Noise Exposure Regulations, 2024

Noise Exposure Regulations, 2024, GN 5953, Government Gazette 52226, 6 March 2025, made under the Occupational Health and Safety Act 85 of 1993

Regulation | Gazette: GN 5953, GG 52226, 6 March 2025; NIHL Regulations, 2003 repealed 18 months from publication (06/09/2026) | Effective 06/03/2025

Promulgated 6 March 2025 with Notices 5952 and 5954 (Physical Agents Regulations, 2024 and amendment of the General Safety Regulations). Repeals the Noise-Induced Hearing Loss Regulations, 2003 with effect from 6 September 2026. Accompanied by a new Code of Practice for Audiometry. Operative noise instrument from 06/09/2026. Confirmed 14/08/2026: published with the Physical Agents Regulations, 2024 and the Code of Practice for Audiometry with explanatory notes. The 85 dB(A) noise rating limit is retained, and a new action level of 82 dB(A) for continuous noise and 135 dB(C) for impulse noise applies where there is concomitant exposure to ototoxic chemical agents or whole body vibration. An exemption notice process under regulation 8(3) is recorded in 2025 to 2026 practice.

Applies to: Agriculture and forestry, Construction, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Mining, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Security services, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 12/08/2026. Next review 06/03/2027.

28. NRTA PrDP medical

National Road Traffic Act 93 of 1996, Chapter 13 professional driving permits, read with the National Road Traffic Regulations, 2000 (GNR 225 of 17 March 2000), regulations 115 to 117: regulation 115 sets the categories of drivers requiring a professional driving permit, and regulation 117(b) disqualifies an applicant who is not medically fit, evidenced by the prescribed medical certificate form completed by a registered health practitioner.

Act | Effective 01/08/2000

Professional Driving Permit applications require a medical certificate on the prescribed form, not older than two months at the time of application, assessing vision, hearing, cardiovascular, neurological, and general fitness.

Applies to: Agriculture and forestry, Cleaning and hygiene services, Construction, Education, Government and municipal, Manufacturing, Mining, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Security services, Telecommunications and tower work, Transport and logistics, Waste management.

Verified 12/08/2026. Next review 12/08/2027.

29. ODMWA

Occupational Diseases in Mines and Works Act 78 of 1973

Act | Effective 01/10/1973

In force August 2026, last substantively amended 1994 and further amended by the National Health Insurance Act 20 of 2023 (currency watch). Administered by the Medical Bureau for Occupational Diseases under the Department of Health: certification of compensable cardio respiratory organ disease in miners and ex miners, benefit medical examinations (two yearly for ex miners at accredited facilities), and lump sum compensation by degree of impairment. Mining lung disease routes here; all other conditions route to COIDA.

Applies to: Mining.

Verified 13/08/2026. Next review 13/02/2027.

30. OHS Act

Occupational Health and Safety Act 85 of 1993

Act | Effective 01/01/1994

Amended over time, including by the Occupational Health and Safety Amendment Act 181 of 1993. In force August 2026.

Applies to: Agriculture and forestry, Cleaning and hygiene services, Construction, Education, Government and municipal, Healthcare and laboratories, Hospitality and food service, Manufacturing, Office and professional services, Petrochemical and fuel retail, Retail and wholesale, Security services, Telecommunications and tower work, Transport and logistics, Utilities and energy, Waste management.

Verified 12/08/2026. Next review 12/08/2027.

31. SANS 3000-4 (RSR)

SANS 3000-4:2011, Railway Safety Management, Human Factors Management, applied as a Railway Safety Regulator regulatory tool for medical fitness in safety critical railway occupations

National standard | Gazette: SANS 3000-4:2011 | Effective 01/01/2011

In force August 2026 as an RSR regulatory tool. Governs human factors management including medical fitness for safety critical railway occupations, with guidance on conditions and medications incompatible with safety critical duty. Clause level values are applied from the standard itself at examination time; the instrument is cited, not memorised clause values.

Applies to: Transport and logistics.

Verified 13/08/2026. Next review 13/08/2027.
