4. Matters discussed

4.1 Representative inspection reports

All four representatives present tabled their inspection reports for March. Ricardo Februarie reported a damaged guard on the slicer at line 2. The machine was locked out on 12 March and the guard was repaired on 13 March. Thandiwe Ngcobo reported ice build up on the cold store floor near door 3.

4.2 Incidents since the last meeting

One incident was reported: a dispatch employee slipped near cold store door 3 on 9 March 2026, received first aid on site and returned to work the next day. The investigation found a faulty door heater strip as the root cause. Until the heater strip is repaired, the ice at door 3 is removed at the start of every shift and checked every two hours, and a barrier with a warning sign keeps people off the area whenever ice forms (action 2).

4.3 Training and toolbox talks

Six toolbox talks were held in March on manual handling and forklift pedestrian routes. Three new employees completed site induction. Refresher first aid training for two first aiders is due before the end of May.

4.4 Recommendations to the employer

The committee recommends that the employer fits anti slip matting at all cold store doors and adds a check of the door heater strips to the monthly maintenance plan. The chairperson accepted the recommendation on behalf of the employer.
